ALFONSO A. PANISALES

Web Developer | Information Technology Graduate

✉ +63 985 086 5725 | panisales.alfonso.arc@gmail.com | github.com/Pongki69 | Brgy. San Antonio, Bay, Laguna

SUMMARY

Information Technology graduate focused on web application development. Built practical projects using Laravel, JavaScript, MySQL, Firebase, REST APIs, and browser automation. Interested in creating useful, user-centered web experiences and continuing to grow as a developer.

KEY STRENGTHS

Web development
Building responsive interfaces and practical web applications.

Technical problem solving
Breaking requirements into clear steps and refining solutions.

Continuous learning
Growing skills across software development, automation, and AI.

PERSONAL PROJECTS

Catalyst Hub | MERN client-service platform
Built a MERN client-service platform that guides a request from submission through agent proposals, client selection, and delivery tracking. The workflow brings request details, messages, progress updates, and team coordination into one workspace. Live project.

Event Horizon | Multi-game event tracker
Created a multi-game tracker for events, character banners, and recurring endgame rotations. It brings countdowns and calendar views together, with Puppeteer-based collection and scheduled GitHub Actions refreshing event data. Live project.

Atheria | 3D agentic AI environment - In progress
Developing an interactive agentic AI concept in a 3D workspace. The current portfolio demo presents a live, navigable interface and simulated agent tasks. Real AI orchestration and a separate farmstead game plane remain planned development.

EDUCATION

Bachelor of Science in Information Technology
Laguna State Polytechnic University, Los Banos Campus | Malinta, Los Banos, Laguna | 2021 - 2025

Senior High School - Information and Communications Technology
CARD-MRI Development Institute | Tranca, Bay, Laguna | 2018 - 2020

TECHNICAL SKILLS

Core	HTML, CSS, JavaScript, PHP
Frontend	React, Bootstrap, Tailwind CSS
Backend	Laravel, Node.js, Express.js
Databases	MySQL, MySQLi, MongoDB, Firebase
AI and foundations	Python, Java, Machine Learning, Agentic AI, NLP - developing familiarity
Tools	Git, GitHub Actions, Puppeteer, REST APIs

LANGUAGES

English, Tagalog

PROFILE

Information Technology graduate specializing in web and mobile application development, with experience in Laravel, React, MySQL, and Firebase. Skilled in building functional applications, automating workflows, and debugging technical issues. Interested in developing secure, scalable, and user-focused software solutions.

EDUCATION

Information Communication Technology 2018 - 2020
CARD MRI Development Institute

Bachelor of Science in Information Technology 2021 - 2025
Laguna State Polytechnic University - Los Baños

PERSONAL PROJECTS

Event-Horizon

https://event-horizon-gray.vercel.app/

Built an automated game event tracking system using Puppeteer to scrape dynamic banner/event data and GitHub Actions for scheduled background updates.

Aetheria [Work in Progress] | Web / Application Project

Building a web platform centered around **custom 3D model/furniture importing**, enabling users to **build personalized 3D environments** across two integrated planes.

Catalyst Hub

https://catalyst-hub-beryl.vercel.app

Developed a full-stack client-service platform using the MERN stack, enabling clients to submit and track project requests, review proposals, and select agents. Includes project management and progress tracking features to streamline client-agent collaboration.
